

Steps For Installing Folx On MAC

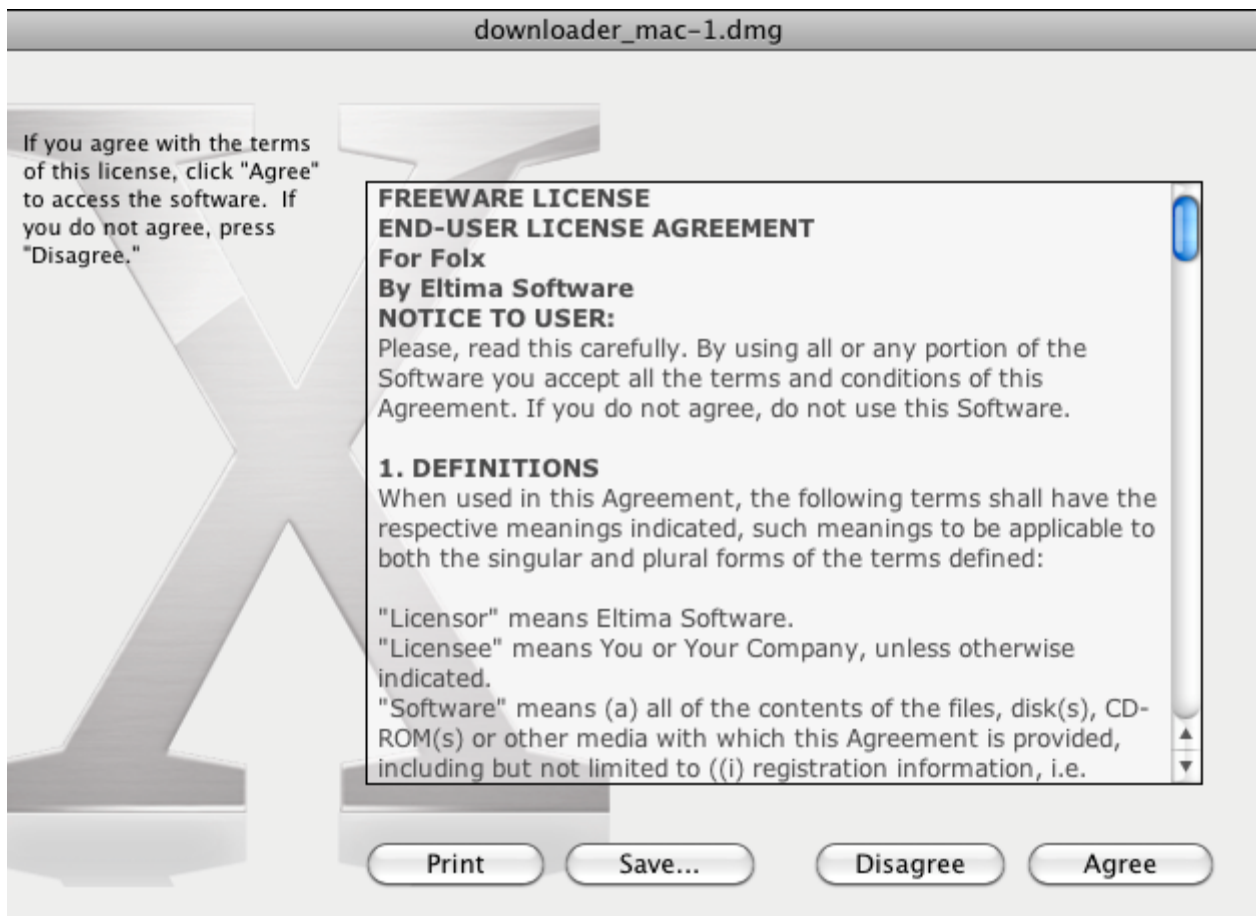

1. Click on link (http://mac.eltima.com/download/downloader_mac.dmg) to download 'Folx' for MAC.
2. Download will start automatically.

3. After download completion, click on the 'downloader_mac.dmg' icon to install the software into MAC.

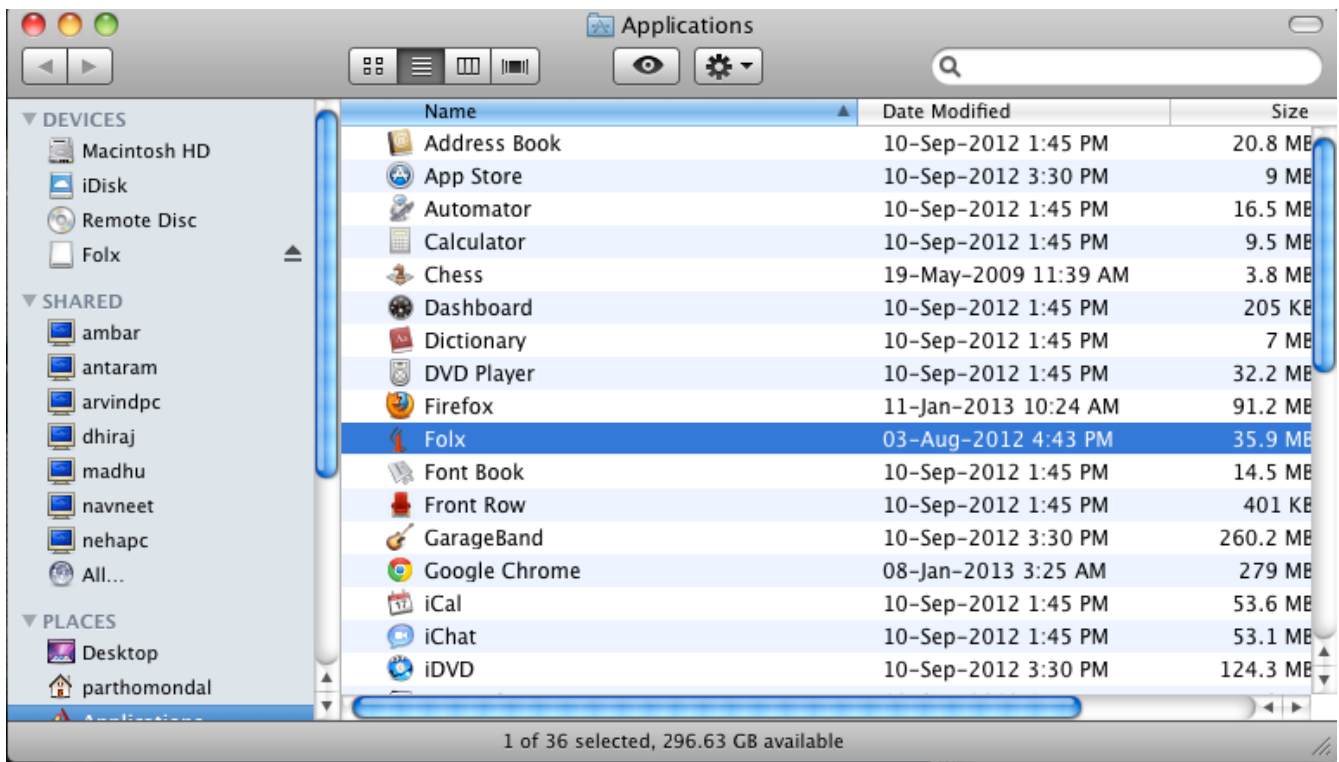

4. Click on '**Agree**' to install software finally into MAC.

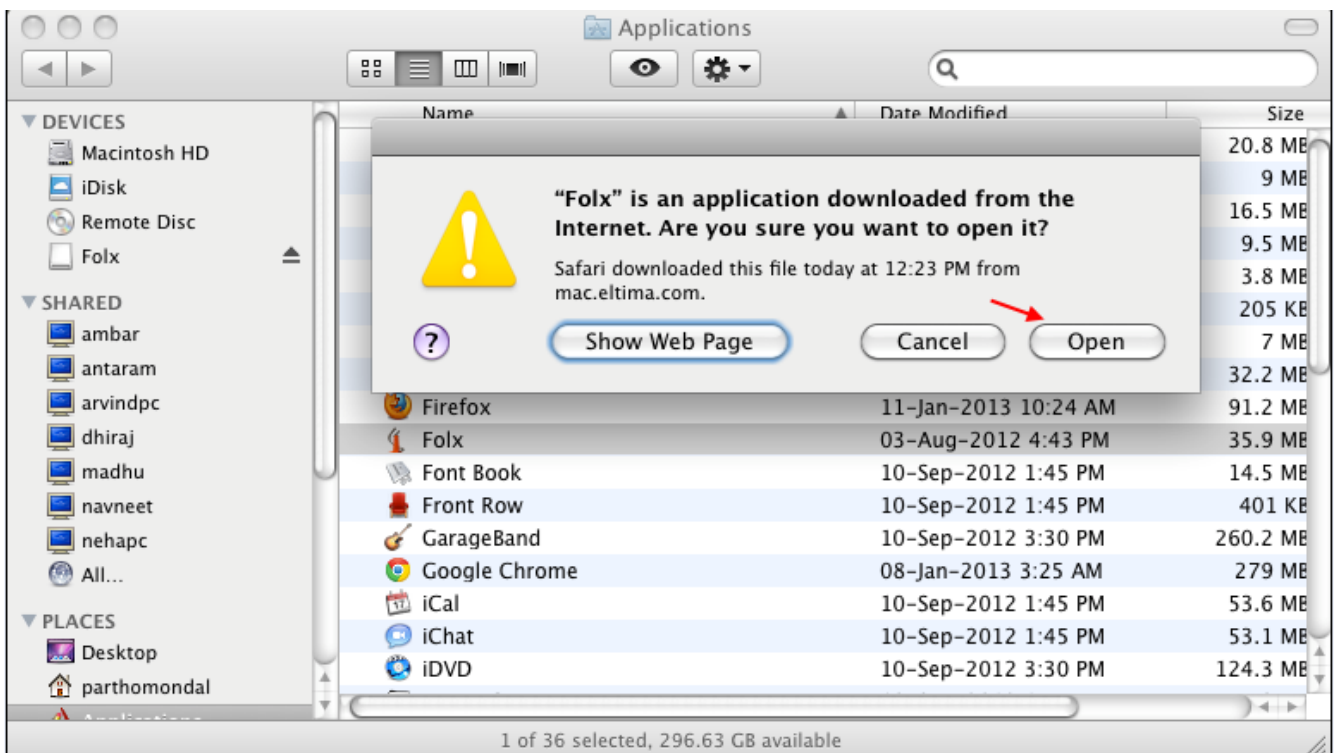

5. After successful installation, the 'FOLX' window will appear. You have to drag the 'FOLX' into 'Application' folder as instructed in the below given screen.

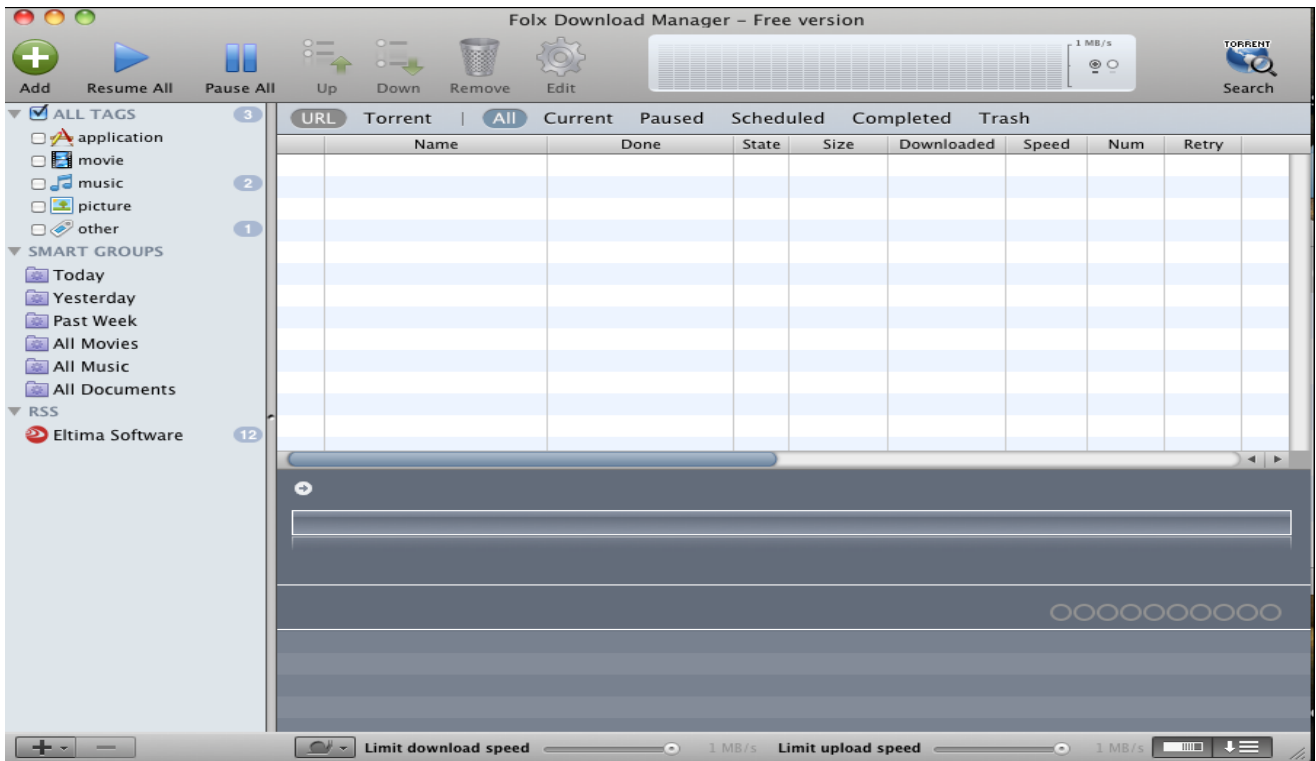

- Once 'FOLX' will move into Application folder, Double-click the 'Application' icon. It will open the Application folder where 'FOLX' icon will appear.

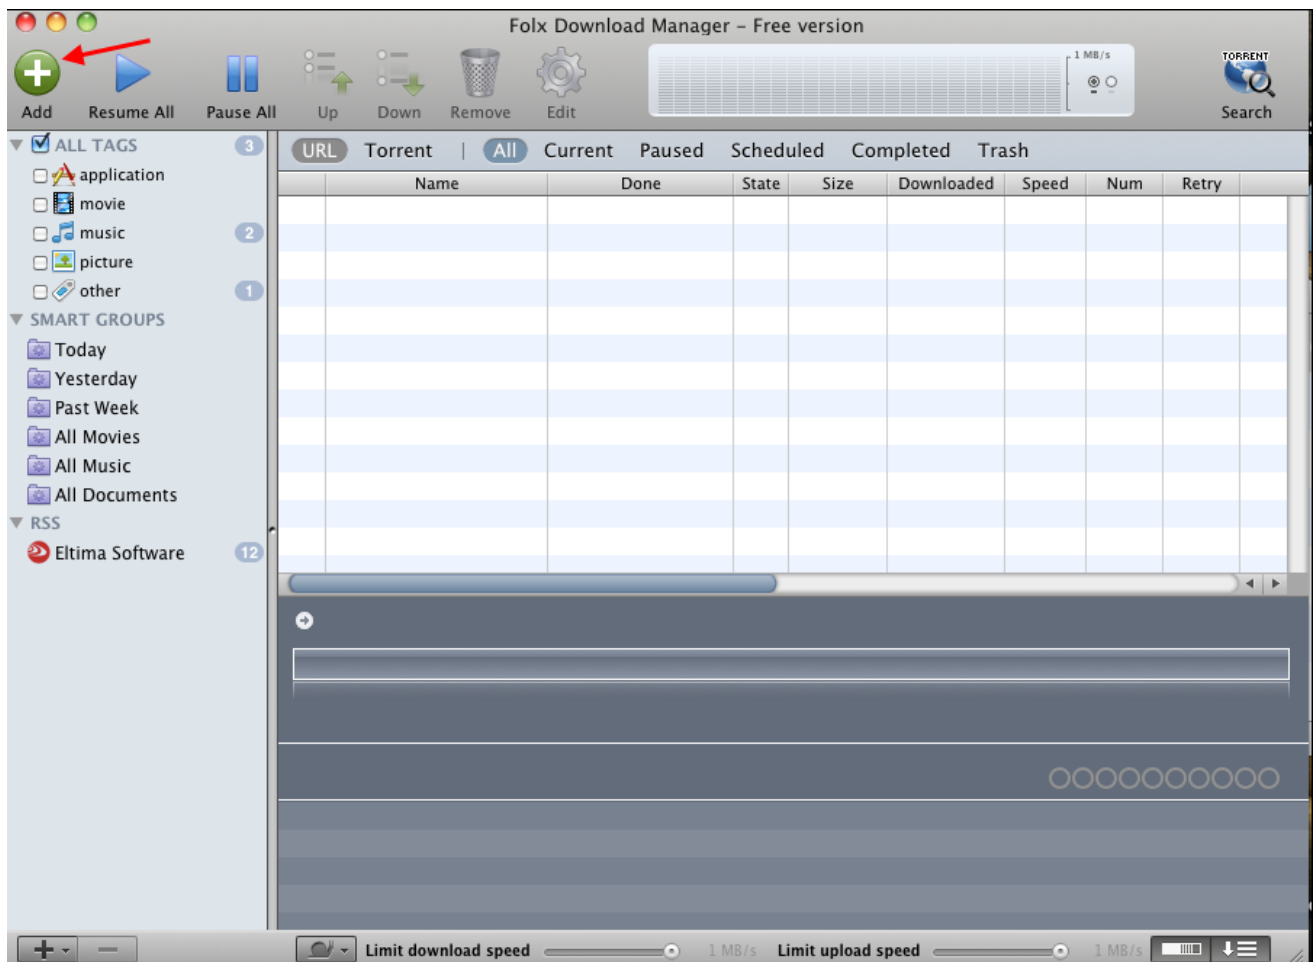

- Double-click the 'Folx' icon to launch the download manager.

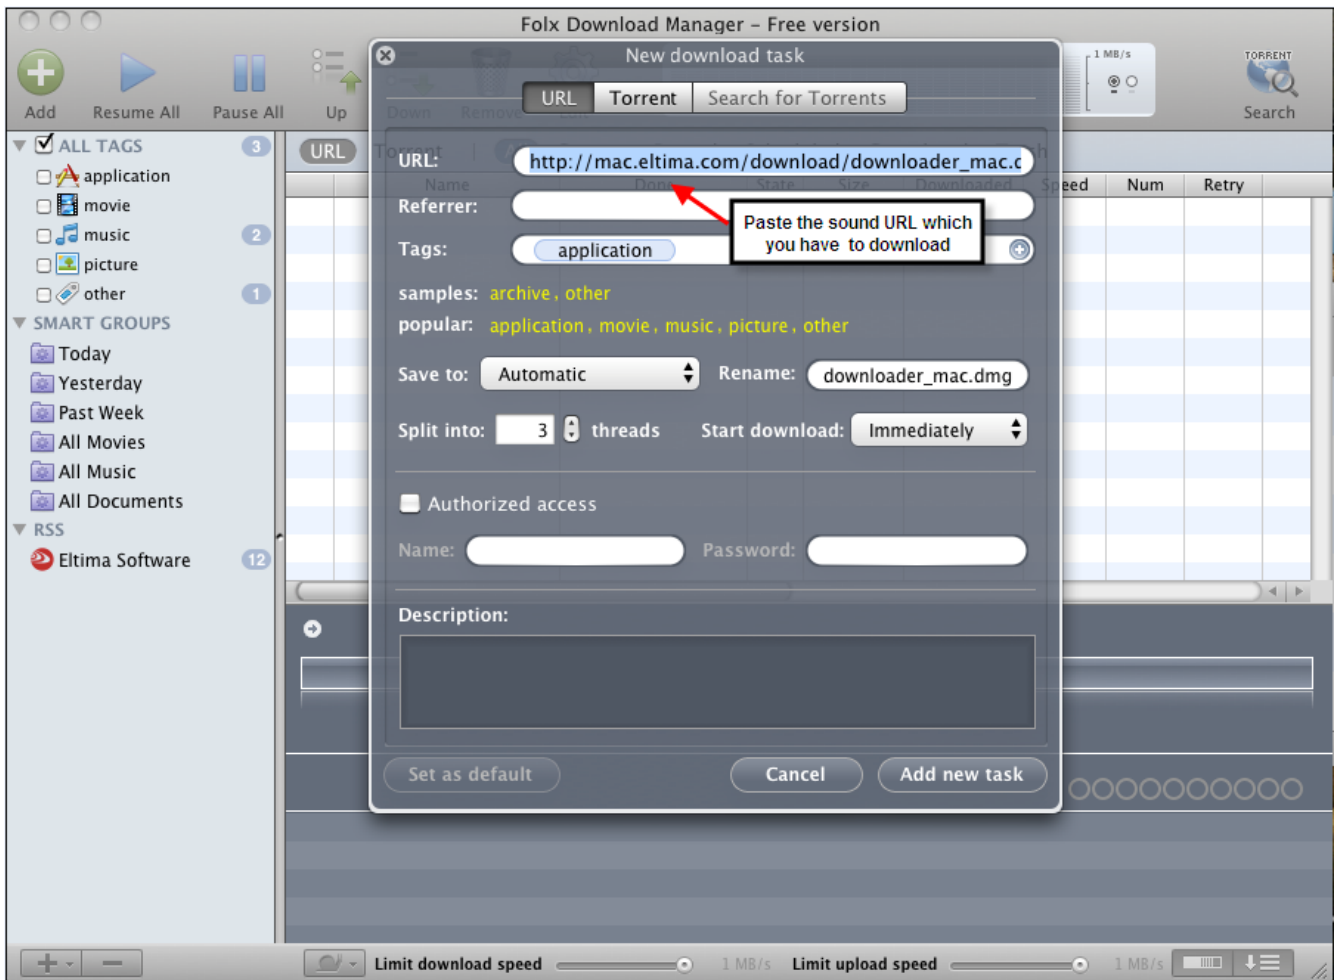

8. Folx (Download Manager) will open to download sounds.

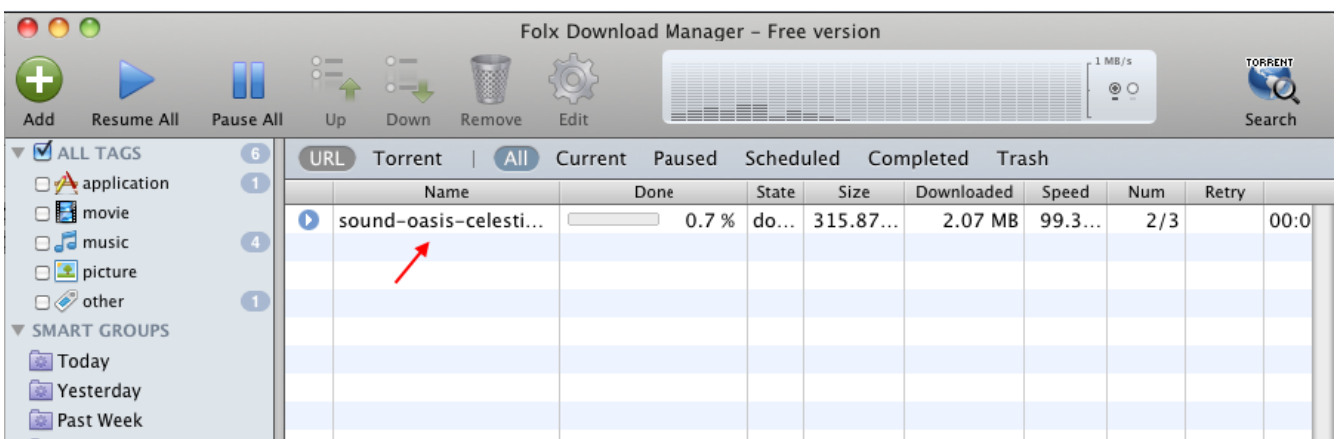

9. Click on '+' icon to paste the sound URL which you want to download.

10. Paste the sound URL into the URL box which you have to download.

11. After that sound will starts downloading.

12. You can also close the above window because downloading will run in the back-end of download manager. You can check the download progress in the small Folx window.

13. Once downloading is complete, double-click the sound to play.
